

RISC-V Compressed Instruction Set Extensions (PhD Position)

Hochschule München is among the largest German universities of applied sciences, located at the heart of Munich, Germany. The working group "AEMY" focuses on safe, secure and smart systems. Our main working areas include RISC-V processor design, WebAssembly runtime development and open source chip design tools.

For our research projects we are looking for a qualified and motivated new team member. This position involves the design of highly optimized RISC-V instruction set extensions. RISC-V is an open instruction set, that has been in the center of innovative computer architecture research. The goal is to explore extensions to RISC-V for highly-optimized embedded systems with minimized memory footprint.

Your profile should cover:

- Understanding of Hardware-/Software-Interfaces
- Fundamental understanding of compilers and tooling
- Not a must: Knowledge of hardware design
- Ideally some experience with RISC-V

Join us now:

- to become a member of a great team in Munich, Germany
- to be in the epicenter of RISC-V and open source chip design
- to pursue a PhD degree at a small and focused research group
- to be actively involved with relevant industry partners in the area
